

## WEEKLY COVID-19 MONITORING SERVICE

Our newly launched Weekly Covid-19 Monitoring Service provides a consistent and consolidated update of governmental measures in a range of jurisdictions. This service allows both corporate and financial institutions users to track how they as employers are impacted in the operation of their businesses by the vast range of recent measures issued by government and governmental departments in response to the Covid-19 pandemic (see below).

The weekly updates will identify measures, guidelines and communications made by government and governmental departments.
