Clifford Chance Seminar: Re-shaping the defence landscape – implications of the EU's ReArm Europe Plan/Readiness 2030 for the global defence industry

Clifford Chance Webinar: Strategic AI infrastructure – building, regulating, and monetising the future

CLIFFORD CHANCE SEMINARS AND BRIEFINGS

Clifford Chance Seminar: Re-shaping the defence landscape – implications of the EU's ReArm Europe Plan/Readiness 2030 for the global defence industry

The next session in the Autumn Perspectives Series will be presented online and in-person by Thomas Krecek, Rob Lambert, Renée Latour, Joanne Neenan, Michael Pearson, Omar Rashid and Thomas Volland on Tuesday 7 October at 12pm EDT / 5pm BST / 6pm CEST at our offices in Canary Wharf, London.

In its ReArm Europe Plan/Readiness 2030, the EU proposed EUR 800 billion in defence spending and established a roadmap to rebuild European defence. In this session, our panel will look at the legal and practical implications of the initiative, including opportunities and risks for the global defence industry and its funders. They will explore what Readiness 2030 means for Europe and the rest of the world, including potential impacts on supply chains, investment diversification and new strategic partnerships.

The discussion is relevant for both "traditional" defence actors and new market entrants

focusing on modern, technology-driven deterrence and warfare as well as their financial backers and investors.

Clifford Chance Webinar: Strategic AI infrastructure – building, regulating, and monetising the future

The next webinar in the Autumn Perspectives Series will be presented online by Renée Latour, Patrice Navarro, Stavroula Vryna, Charlotte Walker-Osborn and Clarice on Thursday 9 October at 8am EDT / 1pm BST / 2pm CEST / 8pm HKT.

AI's growth demands purpose-built infrastructure. This session focuses on AI-ready data centres (high-density compute, advanced networking, liquid cooling, software-defined operations) and AI factories (the layer that turns data into models and services, providing the engine or "brain" which turns raw data into actionable intelligence through AI processes).

Our panel will cover the legal, strategic, and technical frameworks that shape them: data sovereignty and national security, regulation and risk, monetisation and deployment models, and sector-specific duties, with practical takeaways.
